Description			
Require authentication for mutation endpoints:\n- Clone, delete, update should require valid token\n- Currently these are public which is a security risk\n- Use persona.token middleware on:\n - POST /api/v1/personas/{id}/clone\n - PATCH /api/v1/personas/{id}\n - DELETE /api/v1/personas/{id}\n\nRead operations (index, show) can remain public for easier integration.
